

## COSHH Assessment - Cif Creme White - 8662607

<b>Description of Substance</b>	Liquid Abrasive Cleaner
<b>Method of Use</b>	Apply to surface and clean away with cloth
<b>Supplier Details</b>	Unilever UK Limited - Springfield Drive KT22 7GR Surrey, Leatherhead UNITED KINGDOM 0800 776646/Eire 1850 388 399 : unileversds@unileverconsumerlink.co.uk
<b>Assessment Date</b>	21/06/2022
<b>Document Author</b>	Daniel Adams
<b>Review Date</b>	21/06/2023

## Hazard Identification

<b>Risk Level</b>	Not considered hazardous under normal conditions
<b>Persons at Risk</b>	Staff Public Contractors
<b>Routes of Entry</b>	Inhalation Absorption Ingestion
<b>Amount Used</b>	

### Personal Protective Equipment

Hand Protection

### Substance Properties

Corrosive

## Risk / Safety Phrases & Work Exposure Limits

Work Exposure Limits	Risk / Safety Phrases
<p><b>Mineral Salts - 471-34-1</b> <b>Sodium carbonate - 497-19-8</b> LTE (8 hour TWA) Eye Dam./Irrit. 2, H319 ppm <b>Sodium C12-13 Pareth Sulfate - 68585 - 34-2</b> LTE (8 hour TWA) Eye Dam./Irrit. 1 ppm LTE (8 hour TWA) H318 Skin Corr./Irrit. 2 mg.m3 STE (15 mins) H315 Aquatic Chronic 3, H412 ppm <b>Sodium hypochlorite - 7681-52-9</b> LTE (8 hour TWA) 3 ppm</p>	<p><b>H315</b>-Causes skin irritation <b>H318</b>-Causes serious eye damage <b>P102</b>-Keep out of reach of children <b>P280</b>-Wear protective gloves/protective clothing/eye protection/face protection <b>P302</b>-IF ON SKIN: <b>P352</b>-Wash with plenty of soap and water <b>P305</b>-If in eyes, get medical advice <b>P351</b>-If eye irritation persists, rinse cautiously with water for several minutes <b>P338</b>-Remove contact lenses, if present and easy to do. Continue rinsing <b>P312</b>-Call a POISON CENTER or doctor/physician if you feel unwell <b>P332 + P313</b>-If skin irritation occurs: Get medical advice/attention</p>

## Precautions & Controls

### General Precautions

### Further Controls Required

### First Aid Measures

Eye contact : Get medical attention immediately. Call a poison centre or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.

**Inhalation :** Get medical attention immediately. Call a poison centre or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

**Skin contact :** Get medical attention immediately. Call a poison centre or physician. Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. Wash clothing before reuse. Clean shoes thoroughly before reuse.

**Ingestion :** Get medical attention immediately. Call a poison centre or physician. Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

**Protection of first-aiders :** No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

#### **Spillage Procedure**

**Small spill :** Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

**Large spill :** Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collects spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product.

#### **Handling and Storage**

**Protective measures :** Put on appropriate personal protective equipment (see Section 8). Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Keep away from acids. Empty containers retain product residue and can be hazardous. Do not reuse container.

**Eating, drinking and smoking :** should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

**Storage :** Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Separate from acids. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

#### **Disposal Considerations**

**Methods of disposal :** The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

**Hazardous waste :** The classification of the product may meet the criteria for a hazardous waste.

**Methods of disposal :** The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

**Special precautions :** This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out.

Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

## Fire Prevention

Use an extinguishing agent suitable for the surrounding fire.

In a fire or if heated, a pressure increase will occur and the container may burst.

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.
